

## Equitable access to basic needs and supports

<b>Idea 38</b>	Eliminate disparities in home ownership and create affordable housing options in safe built environments
<b>Proposal 38c</b>	Quality options for low-income housing supports
<b>Description</b>	<b>Quality options for low-income housing supports.</b> Families should not be limited in choosing housing options that are geographically-based but should have the right to decide which communities and type of housing they would want to live in (e.g., townhouse, duplex, single family home rental, apartment)
<b>How will the proposed action advance equitable health and well-being?</b>
